► Your Performance - Percentage Score

► Performance Insights - Where do you stand

Score Description

Verbal Aptitude

An average performance in this section. You have a clear understanding on the topics with a few chinks in your armor. You need to improve your application skills in the section which can be solve only by solving application oriented problems. Focusing on advanced concepts and taking up timed tests will help you extend your knowledge to fullest.

Quantitative Aptitude

Your performance in Quantitative Abilities section is not up to the mark. You need to brush up your concept in each topic - one topic at a time - followed by rigorous practice of different question type in each topic to attain improved performance. The more problems you solve, the greater will be the improvement in this section.

Logical Reasoning

A minimally acceptable performance. There is a major scope of improvement. Focus on questions that build your fundamentals and then move to more difficult questions to test the application of the concept.

Technical Computer Fundamental

Your performance in this section is below average. You may have a basic understanding of the concepts, but there is a lack of application of these fundamentals. There is a need to revisit the concepts and solve different types of problems to attain improvement.

Technical core Domain

Your performance in Computer Fundamentals is below par. You may have a basic understanding of the concepts, but there is a clear lack of application. You must revisit the concepts and solve fundamental problems to attain confidence and improvement.

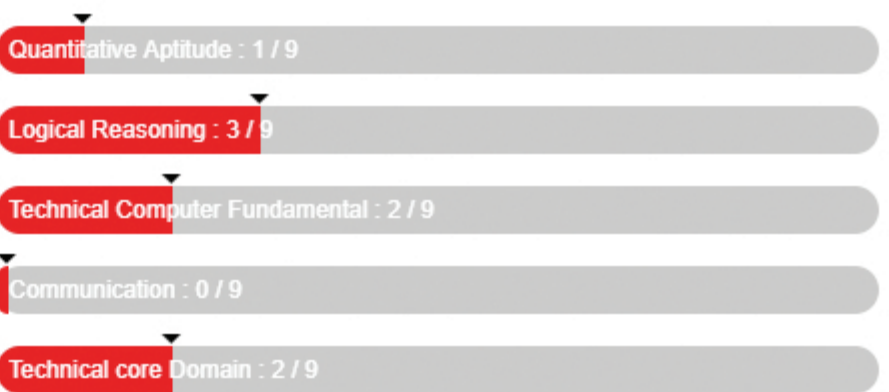

► Areas of Expertise

As per your scores in the assessment, these are the list of areas you are good at. You need to refine your skills in these areas and look to score maximum marks

► Areas of Improvement

As per your scores in the assessment, these are the list of areas you need to improve in. You need to rework on your basic concepts, solve more problems and imprvoe everyday.

► Performance Summary

You have the potential, there is no doubt about it; however you need to hone your skills if you actually want to reflect it in the tests. Its time to get back to the drawing board and figure out your areas of strength and weakness and start working on them. In your Learning Tracks, go through each of the learning content, understand the concepts and then take assessments. Don't fail to run through the solution and see what mistakes you made and how could you have solved the problems better. This will not only improve your skill, but your confidence too and you would be able to perform better. The only person you are destined to become is the person you decide to be! The track has been designed to improve your knowledge; skills and confidence you would need to ace your placement season and achieve your dream job.
